

FOUR FILTER PROCESS

AWAY FROM THE TABLE

FILTER 1: Individual Agency Screening

Individuals within agencies, who have identified situations, where individuals and/or families are facing acutely elevated levels of risk, can complete the referral form and submit it to the designated individual within their agency to be brought forward at the Situation Table.

AT THE TABLE

FILTER 2: Determine Acutely Elevated Risk

First: Limited Follow-up from Prior Filter 4 Interventions

The Table is provided a high level update by the lead agency and a determination is made whether the AER has been addressed. This is to tell the table if services have been connected or not and to close the situation if possible. No details of the intervention or follow-up services are discussed.

Second: New Situations Brought Forward from Filter One

Limited de-identified data is disclosed to determine if Acutely Elevated Risk is present.

More information is required before being able to determine risks present

More work needs to be done by the originating Agency

FILTER 3: Limited disclosure, pause for recognition

Limited disclosure of information is presented to pause for recognition and to determine if (and which) agencies are already engaged with the individual, based on the evident acute risk factors, and if (and if so, which) other agencies should play a role.

Determined agencies are actively engaged and services are moving forward so intervention not required

AWAY FROM THE TABLE

FILTER 4: The 'Door Knock' Intervention

Agencies involved will meet at the end of the meeting to discuss the next step, which should take place within the next 24-48 hours. This intervention is not about enforcing or apprehending. It is about gaining express consent from the client in order to collaborate in offering full support and assistance that, in many cases, the clients were not previously aware of, able to obtain, or had access to.

Wasn't interested initially, but then reached out

Open to Intervention—Consent Obtained—Services Connected

Not Interested—Sector-specific Options Remain for Consideration
