

ENERGY SAVER HOME LOAN PROGRAM (ESHLP)

The ESHLP provides eligible homeowners with the following benefits:

Low interest rate, second mortgage loans ranging from \$10,000 - \$100,000 that support a variety of energy-related home improvements

Financing at your project's start. No cash down, no waiting for rebates or incentive payments

Free end-to-end support through all aspects of the home improvement process, loan closing and post-construction

Identification and coordination of all available incentives, rebates and other credits

WHO IS ELIGIBLE FOR THE ESHLP?

The program is open to income-eligible 1-4 family homeowners with a primary residence in the home. Borrowers must be under 135% of median income to qualify. **Note:** that condominiums do not qualify.

HOW THE ESHLP WORKS

1. You contact the Concierge Service Provider (CSP) for your community, who determines your eligibility and connects you with an Energy Service Provider (ESP).
2. The ESP conducts a free assessment of your home, works with you to create a plan to reduce your energy usage by at least 20%, and helps you identify all available rebates, incentives and tax credits.
3. You engage with a network of pre-approved contractors to obtain quotes for your project. The ESP helps you review quotes and prepare a project budget and schedule.
4. The CSP helps you find a lender that serves your area and prepare to apply for the loan.
5. Once your loan has been approved and closed, you make monthly payments to MassHousing, who manages the disbursement of your funds.

ELIGIBLE HOME IMPROVEMENTS

ESHLP loans provide flexible financing for a wide range of residential clean energy projects that support emissions reduction and healthier homes. Eligible homeowners may use Energy Saver loans to finance health and safety improvements such as roof replacement and oil tank removal, home weatherization, electrical system upgrades, heat pumps, new efficient appliances and fixtures, and installation of rooftop solar panels, battery storage and EV charging stations.

To receive financing through the program, home improvements must reduce total energy usage by at least 20 percent.

For the full list of eligible improvements, see reverse.

BENEFITS OF HOME ENERGY IMPROVEMENTS

Home energy improvements can result in:

- Lower energy usage
- Increased comfort and improved indoor air quality
- Reduced carbon footprint

ELIGIBLE IMPROVEMENTS

- Major contributors to 20% energy reduction requirement
- Minor contributors to 20% energy reduction requirement
- Add-on measures (once 20% energy reduction is met)
